

Extension Activity Report 2023-2024

The department of botany students conducted an extension activity at SSL school on 23/01/24. The II M.Sc. students 11 members were participated in the programme, accompanied by HOD of Botany department and Dr. V. Meenakhi sundaravalli Associate professor of botany.

The students prepared charts, models and games for the school children. They explained about various types of plants and their uses. Conveyed the message of conservation of forest by telling stories.

Conducted activities like spin charts of plants habits, missing words of fruits and vegetables, spices charts also explained by students. Charts were shown to the children and asked them to match the pictures and its uses. Conducted games to make them more interesting and awarded prize for the winners.

Demonstrated how to prepare art out of waste on papers. School children were actively participated in preparing boat, fan, peacock, etc. Then passing ball games were conducted, they actively participated and enjoyed the games. Consolation prizes were given to all the students.

As a result the school children acquired knowledge on various types of plants and the plant parts which we are using in our day today life and their importance.
