In this seminar, we have learnt about what is software engineering , what are the works done by a software engineer. They further thought us about process like agile, DevOps and it's lifecycle etc. They gave us a demo on devOps which was

so interesting. Their slides and explanation made us to understand it more better.
Then we had a Q/A session were students asked their doubts and they clarified

everything in a calm and kind manner.

We student had a great day with those keynote speakers. We thank our department for arranging this wonderful opportunity.
