

WORKSHOP ON ANALYTICS WITH “R”

Organized by Department of Computer Science

Queen Mary's College (A), Chennai-4

on

20th September 2019

Resource Person: **Dr.M.Subbiah**

The Workshop was well organised with technically informative sessions by Dr.M.Subbiah. The detailed information about Data Science and statistical modelling really instilled interest in it. It helped the beginners to learn more about R Programming. The method of training R programming packages installation and its usage helped the students to understand more about R programming library functions. The graphical representation about various statistical operation and command lines execution gains more interest. The attention was given to each and every individual to work on their own, which helped the individual to get insight into R Programming. The way the session was carried out was lively and interesting. From the beginning to the end he maintained the high energy level and made the students also learn with enthusiasm. This workshop made a starter for the PG students to learn R and definitely an initiative to work with projects.
